

# ***Beware of Phishing!***

There have been several new “phishing” emails going around recently, emails that are meant to look like a legitimate business asking for personal information or information on your accounts. Please do not reply to these emails with your information! Polar does send our customers mass email notifications from time to time but we NEVER ask for personal information via email. Delete these “phishing” emails and contact Polar at 1.800.284.7222 if you have any concerns.
