

Network Technician I

Summary

Job Title

Network Technician I

Department

Network Operations

Description

The **Network Technician I** is involved in a wide range of exchange operations, including the installation, maintenance, testing and troubleshooting of all network operations center equipment and infrastructure.

The employee performing in the position will be directly responsible to the Network Operations Supervisor. In his absence the employee will be responsible to the Chief Operations Officer.

The employee shall cooperate and work with all other departments for the maximum benefit of the company or as directed by the Network Operations Supervisor.

The employee shall work a regular 40 hour week as scheduled by Network Operations Supervisor. This position does qualify for approved overtime. The compensation is to be determined within the confines of the wage scale established in the prevailing labor contract.

The employee is required to participate in the on-call rotation schedule.

The employee shall adhere to approved published company policies and receive all benefits and privileges cited therein. Employee is expected to take call outs during off hours and weekends. Employee must live within 60 miles of the reporting site.

The employee should possess a positive attitude and have the ability to work along with other employees. As the opportunity arises, the employee should be able to meet with and deliver exceptional customer service to Polar's customers.
