

get started with the app

The Polar WiFi app allows you to easily manage your home WiFi network within minutes. Download the app and take control of your WiFi network today!

- 1 Download the app. You can search either the Apple App Store or Google Play Store for Polar WiFi, then install it on your mobile device.

- 2 Select "SIGN UP" towards the bottom of the screen.

- 3 Enter your personal information. The password you enter here will be used to access the app.

- 4 Select "Yes" to continue.

- 5 Tap the QR code that appears within the app. (You will be asked to allow access to your camera.) Point your camera at the QR code found on the bottom of your GigaSpire BLAST router, or on the side of your GigaCenter (example shown below). Select OK.

- 6 Tap the "Click here to skip" text since your WiFi is already working.

Click "Submit" and you're done!

create a guest network

- Tap the "+" icon from the main menu.
- Select "Networks".
- Select "Guest" in the dropdown menu.
- Give your Guest Network a name (SSID) which will be visible to guests.
- Select security type, if desired.
- Choose a password.
- Select isolation if you do not want the user to be able to access your other wireless networks.
- Set the duration to endless or create a custom duration.

basic parental controls

- Tap the "+" icon from the main menu.
- Select "People" to create a new profile.
- Add a name and photo if desired.
- Select the devices which belong to this profile.
- Select "Done".
- From the home screen, select "People" and select the desired profile.
- Swipe the Internet Access toggle off to pause all devices connected to the profile. Toggle on to bring devices back online.
- Set time limit schedules to turn Internet access off for all assigned devices during specific times and days.

update wifi network name and password

- Select “My Network” on the home screen.
- Select “Networks”.
- Select the network you wish to update the name or password for.
- Press “Edit” and update your information.

Note: Changing your SSID or password will require you to reconnect all your wireless devices previously connected to that network.

run a speed test

- Select “My Network” on the home screen.
- Select your main router.
- Select “Bandwidth Test”.
- Select “Run Test”.

The speed test will first run between the GigaSpire BLAST and the Internet and then will conduct a speed test between any mesh units and the GigaSpire BLAST. Results will show as a notification in the app and update on the screen.

view devices on your network

- Select “Things” from the home screen.

notifications

View notifications from the home screen by selecting the bell icon in the top right. To edit notification settings, go to Settings and Notifications.

ExperienceIQ

This powerful feature lets you manage screen time, content, and access to websites and applications, all from the app. It also lets you prioritize which devices should get preferred connection so if you work from home and want to make sure you always have enough bandwidth, this feature is for you.

ExperienceIQ is part of the Ultimate WiFi plan from Polar!

Upgrade to Ultimate WiFi for
\$12.95/mo.

ProtectIQ

As hackers become increasingly sophisticated, your network requires an equally innovative solution. ProtectIQ keeps a lock on your network and alerts you when unwanted visitors, hackers, viruses, or malware try to visit. If it's connected, it's protected!

ProtectIQ is included as part of all Polar WiFi plans!
